

SECRET/NOFORN - HANDLE VIA SKEET CHANNELS ONLY

PROJECT SUN STREAK (U)

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

PROJECT NUMBER: 1022

SESSION NUMBER: 1

DATE OF SESSION: 23 JUN 88

DATE OF REPORT: 23 JUN 88

START: 0901

END: 1014

METHODOLOGY: CRV

VIEWER IDENTIFIER: 025

1. (S/NF/SK) MISSION: Stage 3 training; site was Cappadocia Caves, Turkey. [Note: This site was selected specifically for its level of complexity; it is ordinarily the most difficult Stage 3 site with which a CRV trainee is presented].
2. (S/NF/SK) VIEWER TASKING: Coordinates 3840/1022.
3. (S/NF/SK) COMMENTS: A commendable, if not arduous, performance on the part of 025 against this tough site. The viewer was informed, both during and after the session, that this was the most difficult site, requiring the most work, of any Stage 3 task. The final site sketch can be found on page 9 of the transcript; it represents ideal Stage 3 contact, both in aspect and dimension. Further, at no time during the session did 025 attempt to "guess" what was being dealt with, (i.e., the "content" of the signal line)--the total effort was placed upon CRV structure.
4. (S/NF/SK) EVALUATION: [] 4

KODACHROME (ABOVE), BY JONATHAN S. BLAIR, EPIGRAPHIC BY ASIA CANON & N.G.S.

Less than 200 miles from Ankara, Turkey's modern capital, lies timeless Cappadocia. In the prehistoric past, 12,848-foot Erciyes Dağı spewed a mantle of lava and ash over the region, eroding rains and wind created the cone-spiked scenery of today. Here, at the peak of population, some 30,000 early Christians sought haven. The First Epistle General of Peter, addressed to dispersed Christians, includes the Cappadocians in its salutation, but the Biblical name Cappadocia no longer appears on modern Turkish maps.
